RE: Future Use Plan and Site Maintenance

Dear Mr. Rossetti,

Following up on one of the concerns raised at the Public Hearing from 17 June 2020, I wanted to confirm that USS Shelton Solar LLC, to the best of our knowledge and based on conversations with the site owner, will not affect or hamper any future use plans. The acreage for this project is overall quite small compared to parcel and there would be ample room for any other development happening in concert. We would coordinate as much as possible on any of those planned developments, if and when the City of Shelton and the Materials Innovation and Recycling Authority choose to proceed.

One further confirmation of note from the Public Hearing: USS Shelton Solar LLC would be responsible for any maintenance of our solar array and the vegetation beneath it, as well as the eventual removal of the equipment at the end of its useful life.

Please let me know if there are any further questions about either of these pieces or any other part of our project application and design. I am happy to clarify and discuss.

Best,

A handwritten signature in blue ink, appearing to read 'P. Schmitt'.
