PROPOSED ORDINANCE FOR SCHOOL BUS STOP ARM PROGRAM
AND ENFORCEMENT

ADJOURNMENT

Theresa A. Johnson

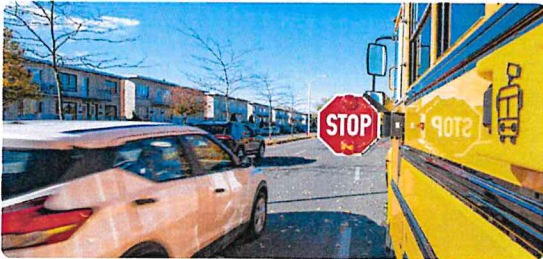

2025 MAR 19 PM 1:01

CITY OF SHELTON
TOWN CLERK

OUR MISSION

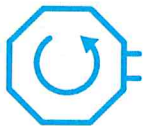

Founded in 2017, our mission is to make the ride to and from school safer for all children. We partner with school districts, law enforcement, and municipalities to modernize entire school bus fleets, and curb reckless motorist behavior around buses. BusPatrol's turnkey artificial intelligence (AI)-powered platform is the most deployed school bus stop-arm enforcement solution in the nation, serving over 30,000 school buses across 17 states.

DID YOU KNOW?

Each year in the United States, an estimated 45.2 million motorists illegally pass stopped school buses, endangering children.

- NASDPTS Illegal Passing Survey, 2024

TURNKEY SOLUTION

The entire program is managed by BusPatrol, so you can focus on the bright minds of tomorrow.

FULL FLEET: EQUITABLE ACCESS TO SAFETY

Modernize every bus to protect every child.

CURB DANGEROUS DRIVING BEHAVIOR

Once motorists know the law is enforced, they learn to stop for the bus.

Key Benefits

- Cutting-edge internal cameras to promote comprehensive school bus safety.
- Public awareness resources to educate the community about traffic safety laws.
- Invaluable data reporting to enable better route planning decisions.
- Dedicated in-house field service for system assembly, installation, and maintenance.
- Turnkey solution including equipment, operations, payment, and court support.
- Violator-funded program. Reckless motorists who put children at risk help pay for the technology.

The Nation's Most Trusted and Deployed School Bus Stop-Arm Safety Program

BusPatrol is the most trusted and deployed school bus stop-arm safety program nationwide. We proudly collaborate with hundreds of school districts and municipalities, safeguarding over 1.6 million students across 17 states, with our services deployed on over 30,000 school buses.

Our support extends across the spectrum of fleet sizes, catering to the smallest fleets comprising a few buses to the largest ones, which range from 500 to 5,500 buses. Notably, an impressive 80-85% of our clientele entrust us with the modernization of their fleets by incorporating internal cameras. This technology is particularly embraced by school bus drivers who, while ensuring road safety, cannot simultaneously monitor the interior of the school bus.

THE NATION'S MOST DEPLOYED STOP-ARM ENFORCEMENT PROGRAM
